SELECTING A PROCESS FOR YOUR GREEN BELT PROJECT

What is a process?

A good process for a Green Belt project is:

- a priority to the organization, not a make-work project
- having a major negative impact on end users/clients
- simple enough to be used as a first step to Lean
- short enough (time to complete one cycle) to be able to see results within 1 2 months
- one that people (the process owner and those who do the work) want to improve

Examples of successful Green Belt projects

- Contracting
- Filling an Acting assignment
- ATIP requests
- Financial forecasting
- Risk assessments
- Creating, reviewing and approving a briefing note
- Issuing permits
- Quarterly program updates
- Grants and contributions
- Accounts payable
- IT change requests
- Responding to complaints
- Publishing an intranet article

Prioritization techniques

- 1
- Reduce the list of potential process to those that are most significant to you
- 2
- Identify your top priority process(es)
- 3
- Use a prioritization to matrix to evaluate each candidate process
- 4
- Vote. It's less scientific but it's good enough for a team to reach consensus

Filling in a prioritization matrix

Adjust the criteria for evaluation and weighting to meet the needs of the organization

			Q.
